

24Frames — Feature Testing Checklist

Updated Comprehensive QA Verification Protocol for iPhone 13 mini

1. ■ Camera Viewfinder & Frame Alignment

- [] **Edge-to-Edge 4:3 Window** — Viewfinder spans 100% full screen width (375pt x 500pt) with zero side bars.
- [] **Lowered Bottom Shutter Bar** — Shutter button, thumbnail, and camera flip buttons sit near bottom edge.
- [] **Back Camera Orientation** — Primary wide angle back camera is un-mirrored in preview and saved photos.
- [] **Front Selfie Camera Mirroring** — Selfie camera preview and saved photos are mirrored to match viewfinder.
- [] **Tap-to-Focus & Exposure** — Tapping anywhere on the 4:3 viewfinder adjusts focus and exposure box.

2. ■■ 24-Frame Film Roll Metaphor & Countdown

- [] **24-to-0 Roll Countdown** — Top countdown number ALWAYS counts down from 24 to 0 per 24-picture roll.
- [] **Mustard Yellow Infinity Symbol** — In Infinite Mode, a small yellow '∞' symbol sits next to the 24-to-0 roll counter.
- [] **Infinite Roll Refresh** — In Infinite Mode, reaching 0 or submitting a roll immediately grants a fresh 24-frame roll.
- [] **Single Daily Roll Limit** — In Standard Mode, taking 24 photos locks taking further shots until midnight.

3. ■■ iPhone Settings App Integration (Settings -> 24Frames)

- [] **System Settings Menu** — Navigate to iPhone Settings app -> 24Frames to access preferences.
- [] **Infinite Pictures Mode** — Toggle ON: Enables infinite 24-frame rolls with yellow infinity symbol.
- [] **Black & White Photos** — Toggle ON: Live viewfinder, fly-to-corner animation, and saved photos render in monochrome.
- [] **Develop Photographs Mode** — Toggle ON: Holds photos in pending roll and hides corner thumbnail.
- [] **Development Speed** — Segmented picker: 'Develop immediately', 'Fast development: 2 Hours', 'Overnight development'.

4. ■■ Scheduled Film Development Workflow

- [] **Hidden Corner Thumbnail** — In Develop Mode, the bottom-left photo thumbnail is hidden (photos are un-developed).
- [] **Top Header Film Roll Icon** — White film canister icon with arrow appears in top header bar.
- [] **Roll Notification Badge** — Red badge on film icon shows count of unsubmitted photos in active roll.
- [] **Development Countdown Timer** — Live timer (e.g. 01h 45m) displays next to film icon showing remaining development time.
- [] **Confirmation Alert** — Tapping film icon shows: 'Are you sure? You took X pictures. You can only get one roll of pictures for today.'

5. ■ Hardware Buttons & App Capabilities

- [] **Hardware Volume Buttons** — Pressing physical Volume Up or Volume Down captures a photo with system volume HUD hidden.
- [] **Camera Flip Toggle** — Flip button seamlessly switches between front and back primary wide cameras.
- [] **Red Frame App Icon** — Red rectangular frame 24 logo displays on iPhone Home Screen.
- [] **Home & Lock Screen Widgets** — Add 24Frames widget to Home Screen or Lock Screen to display remaining roll count.
